

Balzac Coffee Table

The Balzac design is an expression of Tom's interest in sculptural forms and the geometry of metalwork. It's a contemporary coffee table forged from sheets of steel, carefully joined to create a fortress of fortitude. The design is typically topped with bronze, to which we can apply a dull polish or an aged patination to give it extra character. Opt for the finish of your choice for the base to create the perfect customised combination for your interior. The design is shown here in 'Bridge Red' with a 24-carat gold-plated top, fusing the industrial form of this sculptural coffee table with the luxe glint of precious metal.
