

Edge Side Table

The Edge side table is one of Tom's more graphic, linear pieces. It's a minimalist design composed of just three elements: two plates of steel and one top in the material of your choice. We can fit a gold-plated top, a slab or marble, or a solid bronze plate. Similarly, the base can be completed in your choice of finish, all of which are available to view alongside our full offering of materials here. If you do opt for a marble top, we'd suggest reading up on how to care for marble. This design is also available in a round format, as well as a bedside table iteration which comes with an integrated drawer.
