

Phoenix Chandelier

The Phoenix chandelier is a dramatic and intriguing trio of aluminium spears that hang from a polished brass stem. Like the rest of the Phoenix collection, this metal chandelier draws inspiration from the streamlined, glinting forms of '70s Italian design. The stem itself is made of adjustable rods that offer complete control over the direction of light. It makes a beautiful focal point when hung above a dining table, working equally well as a centrepiece to a living area or office.

Materials:

Chandelier: Aluminium & Perspex, Ceiling Rose & Stem: Polished Brass
